NAGARJUN PARMAR

SENIOR SOFTWARE DEVELOPER | .NET | BACKEND ENGINEERING

Gujarat, India | nagarjun.parmar1993@gmail.com | linkedin.com/in/nagarjun-p-5420171b4 | Portfolio: jigs-mvc.github.io/nagarjun-portfolio/

PROFESSIONAL SUMMARY

Software Developer with professional experience since 2020 developing and maintaining web applications and backend services using C#, .NET, ASP.NET MVC/Core, APIs, and SQL Server. Experienced in backend feature development, database-driven business applications, API integration, debugging, application support, and outsourced software delivery. Has contributed to contact-centre quality evaluation and transport-management solutions, alongside AI-assisted development practices.

TECHNICAL SKILLS

Languages & Web: C#, JavaScript, HTML, CSS, ASP.NET MVC, ASP.NET Core MVC, Razor Pages

Backend & APIs: Backend application development, REST APIs, API integration, service integrations, gRPC

Data & Persistence: SQL Server, MySQL, Entity Framework Core, EF Core migrations, Dapper, SQL queries, stored procedures

AI-Assisted Engineering: AI-assisted development, prompt engineering, agentic workflow concepts, Markdown documentation and instruction files

Tools & Practices: Visual Studio, Visual Studio Code, Git, GitHub, debugging, application maintenance, code quality

PROFESSIONAL EXPERIENCE

Senior Software Developer | Etech Global Services | *May 2026 – Present*

- Develop backend functionality and enhancements for a contact-centre quality evaluation application.
- Research and implement new features while improving existing application capabilities.
- Work with application logic and SQL Server data operations to support feature delivery and maintenance.

Software Developer | Etech Global Services | *September 2024 – April 2026*

- Contributed to backend development, application enhancements, defect investigation, and ongoing maintenance.
- Collaborated with team members to support reliable delivery of application changes.

Senior Software Developer | PrishuSoft, Ahmedabad | *June 2021 – September 2024*

- Developed backend features for a transport-management application covering daily job and employee/driver entries and customer invoicing.
- Supported customer issues, investigated application behavior, and helped resolve reported problems.
- Assigned development tasks and coordinated team workflow to support project delivery.

Junior Software Developer | Desai Software, Surat | *March 2020 – June 2021*

- Contributed to outsourced software development assignments using .NET Core, C#, APIs, and SQL Server.
- Developed and maintained backend/API functionality according to project requirements.
- Worked with SQL Server for application data operations and supported debugging and maintenance across assigned work.

SELECTED PROFESSIONAL PROJECTS

QEval | Contact-Centre Quality Evaluation | *Etech Global Services*

- Develop backend features for a contact-centre agent quality evaluation solution.
- Research and deliver enhancements to the call player to improve the call-review experience.
- Contribute to speech-to-text call analysis workflows that present evaluation verdicts, interaction summaries, and agent-performance insights.
- Develop chatbot functionality that answers quality-assurance questions using uploaded call content.
- Technology stack: .NET, C#, SQL Server.

iCON | Transport Management & Customer Invoicing | *PrishuSoft*

- Develop backend functionality for a transport-management application used to maintain daily job records and entries for employees and truck drivers.
- Support customer invoice generation based on recorded operational entries.
- Handle customer support and troubleshoot application issues.
- Assign development tasks and coordinate team workflow.
- Technology stack: .NET, C#, SQL Server.

Outsourced Software Development Assignments | *Desai Software*

- Contributed to outsourced development work across assigned software requirements rather than a single dedicated product.
- Worked on backend functionality and API development using .NET Core and C#.
- Used SQL Server for data access and application data operations.
- Technology stack: .NET Core, C#, APIs, SQL Server.

EDUCATION

Bachelor of Engineering (B.E.), Information Technology | Atmiya Institute of Technology & Science | March 2013 – June 2016

Diploma, Information Technology | Balaji Institute of Engineering and Technology | June 2010 – February 2013
